How does remote proctoring work?

- Examinees must remain at their computer, with their face fully visible to their webcam, for the entirety of each 90-minute test session.
- The proctoring software will record the applicant (audio and video) throughout the exam session. The recording will be uploaded to ExamSoft along with the examinee’s answer files.
- ExamSoft’s artificial intelligence (AI) program will analyze the recording and will flag any unusual behaviors, movements, or sounds.
- All flagged footage is then reviewed individually by two human proctors to determine whether further analysis as to potential cheating or dishonest conduct is necessary. For example:
  - A dog barking in the background might be initially flagged by AI but cleared upon review.
  - The mere fact that a sound or behavior generates a flag does not necessarily mean that CBEC will formally investigate or take action against an applicant for exam misconduct.
- The proctors reviewing exam footage will not have access to any personally identifying information for examinees; all exam materials, including exam footage, are connected only to an examinee ID number.

When must exam answer files and audio/video files be uploaded?

- The deadline to upload all exam answer files and all audio/video files is 12:00PM (EDT) on Friday, October 9, 2020. Any examinee who has questions about whether a file successfully uploaded or who needs assistance uploading any file(s) must contact ExamSoft prior to this deadline.

They must be received by mail or delivered in person during business hours. Withdrawals will not be accepted electronically.
