To whom it may concern

I have taken notice to the new proposed bail bonds law. I have been a bailbonds for 2 years now and I have seen how effective it is with having bailbonds one they don't reoffend often because of the financial state they are in however if they could commit a crime pay a certain amount be guaranteed their going to get the money back once the case is over if it is 7% or 10% what would then stop them from reoffending. I think it would be dangerous for all woman who deal with the the domestic violent offender as they are now put at a higher risk of danger and an increase fear . Calling the police on someone just for them to be release with a fee of such low limits. PTA's should just be imposed since the control of bail is trying to be changed! I don't understand why the change? What is broken that we're trying to fix?
